

GreatRibbon™ PGR-Plus

Thermal Transfer Ribbon Premium Grade

PRODUCT SPECIFICATIONS

PRODUCT DESCRIPTION:

GreatRibbon PGR-Plus is premium grade general purpose 4.5 micron thermal transfer wax/resin ribbon selected specifically for use with the DATAMAX/PIONEER line of thermal transfer printers. Its excellent imaging properties and back coating make it an ideal ribbon for a wide variety of applications and substrates. It is recommended for most general purpose retail and industrial applications in which increased smudge and scratch resistance properties are important. This ribbon yields excellent results on a wide variety of substrates.

Service Temperature: 41°F to 95°F at 20% to 85% relative humidity

APPLICATION NOTES:

- Recommended for general purpose retail and industrial labeling
- Ideal for applications requiring a high quality image and medium grad durability at an economical price
- IR and visible light scannable
- Excellent scratch and smear resistance on most materials
- Prints on a wide variety of substrates including paper, spunbound olefin and polyester

SUGGESTED APPLICATIONS:

- Carton labeling
- Product identification
- UPC/EAN labels
- AIAG, LOGMARS and other compliance labeling applications
- Price marking
- Item tracking
- Work-in-progress

INK FORMULATION:

Wax-resin

RECOMMENDED MATERIALS:

GreatLabel™ TTL, GreatTag TTT, Kimdura®

SHELF LIFE:

One year at % relative humidity and °F. Avoid high temperature, high humidity and direct sunlight during storage.
