

GreatRibbon™ SDR

Thermal Transfer Ribbon Super Durable

PRODUCT SPECIFICATIONS

PRODUCT DESCRIPTION:

GreatRibbon SDR is a high quality extremely durable 4.6 micron thermal transfer resin-based ribbon. Designed for use with polyester and vinyl labels, it has superior smudge and smear proof imaging characteristics. An excellent ribbon and label system combines DATAMAX's GreatRibbon SDR and FanTastock polyester labels. Printed labels do not require any special treatment, such as overlaminates, for very environmentally tough applications. GreatRibbon SDR is UL Recognized in combination with FanTastock when printed on the Prodigy™ label printer under "Component -- Marking and Labeling Systems".

APPLICATION NOTES:

Service Temperature: 41°F to 95°F at 20% to 85% relative humidity

- Recommended for environments and applications where the ultimate in label and image durability is required.
- Remarkable scratch and smear resistance.
- Resistant to alcohol and petro chemicals
- IR and visible light scannable

SUGGESTED APPLICATIONS:

- Asset management
- Serial number and identification labels
- Durable goods
- Outdoor applications
- Jewelry labels
- PC board labels
- Bin and shelf labels

INK FORMULATION:

Resin

RECOMMENDED MATERIALS:

FanTastock

SHELF LIFE:

One year at % relative humidity and °F. Avoid high temperature, high humidity and direct sunlight during storage.
